

The Free Power-Packed, Open Source  
Personal Productivity Suite for

**MS Windows, Mac OS X, GNU/Linux**

Six feature-rich applications for all your document  
production and data processing needs.

**Writer, Calc, Impress, Draw, Math, Base**

Designed to address **your office needs**, whether the  
office is **you** doing it all or whether **you** as part of a  
larger document production environment. Enjoy  
LibreOffice functionality included for master  
documents, networked printing services  
or even that quick web page.

LibreOffice uses the **Open Document Format**,  
recognized by many governments worldwide, as the  
default format for office documents.

**You, too, can get involved!**

***Exchange Data With Other Suites***

The default LibreOffice document format  
is the Open Document Format (ODF),  
which was approved by the ISO on 30/11/2006  
as an international standard (ISO / IEC 26300).

ODF is recommended by numerous governments  
and NGO's worldwide, with Indonesia, the European  
Commission, and NATO amongst other's supporting  
policies calling for ODF as the preferred document  
production, retention and exchange format.

For extended interoperability, LibreOffice supports  
document formats of many other office suites,  
from the most current to numerous legacy formats.
